

Letter from the DLCA Board President :

Dear Davis Lake Residents,

I would like to thank everyone for their patience and understanding during the renovation projects for the clubhouse area. We know it has been an inconvenience for some of our neighbors. however, we hope everyone will enjoy and benefit from the improvements being made.

Your Board of Directors have been working diligently to ensure the successful implementation and completion of several Capital Improvement Projects for this year. Renovations to the clubhouse were made which included upgrades to our restrooms and exercise room as well as a fresh coat of paint for the balcony area. The turf around the perimeter has been replaced and new flowers and plantings have been added to common areas throughout the neighborhood.

With neighborhood security seemingly on everyone's minds, we are in the process of upgrading our camera surveillance system and adding new signage.

Additionally, the Board is currently gathering information and estimates for changes or replacement of our community website.

I would also like to thank our new Community Manager Barrie Rojahn and Hawthorne Management Company for their assistance with these projects as well as their efforts in helping make this a smooth transition from Cedar to Hawthorne.

Thanks also goes out to our Aquatic & Event Director Megan Morsillo who helped schedule and coordinate events around the construction work.

This has been a great year for our community thus far with several well attended events and activities. I would like to encourage everyone to come out and meet your neighbors and take advantage of all that Davis Lake has to offer.

Finally, a reminder that all residents are welcome at the monthly Board meetings. We're a volunteer Board doing our best to serve the needs of Davis Lake, and we value your participation. Meetings are held the last Thursday of the month at 7 PM at the clubhouse.

See you at the next meeting!

Paul Crowder, President
Board of Directors
Davis Lake Community Association
